

**Software Tools Bounty: 100 points**

Senior Seminar

CMSC 461

Spring 2026

**Name:** \_\_\_\_\_

Pick one of the following technologies:

memcached (<https://github.com/memcached/memcached>)

RabbitMQ (<https://www.rabbitmq.com/>)

PostMan ( <https://www.postman.com/> )

Doxygen ( <https://www.doxygen.nl/> )

Spend 20-30 minutes reading about the tool. Then answer the following questions about it:

1. Which tool did you pick to research?
2. What is the main use/application of the tool you chose?
3. What are some ways you could use/integrate this tool into your senior seminar project?
4. Give a rough estimate, in hours, of the time it would take to integrate the tool into your project.
5. What are some drawbacks of using the tool you researched?
